

Making goods accessible anytime for everyone

We revolutionize urban logistics with our automated drone delivery network. Elevate your urban delivery experience with us: We ensure swift and seamless deliveries within minutes.

CASE STUDY IN COLOGNE

USE CASES

Medical Networks

Fast and seamless transport of medical goods enables hospitals to optimize the use of external resources, potentially minimizing the need for extensive on-site infrastructure.

- ▶ Test and pathology samples are transferred to laboratories in minutes
- ▶ Expensive medication can be delivered on demand

Retail Networks

A sophisticated network of automated delivery points strategically placed in urban areas ensures that retail products can reach customers within minutes, day or night, directly from distribution centers.

- ▶ Unique benefits for retail customers
- ▶ Unprecedented efficiency achieved through a fully automated delivery process
- ▶ Significant cost savings possible in both rent and personnel expenses through innovative redesigns of retail infrastructures

Industrial Networks

Rapid intra- and inter-connectivity among large industrial sites boosts development processes, enhancing iteration times and optimizing daily operations.

- ▶ Instant in-house delivery of prototypes, spare-parts and documents
- ▶ Seamless integration with partner networks or external deliveries

TECHNOLOGY

THE RAY

A transport drone specifically designed to mitigate all urban risks through low-noise ducted fans, redundant systems, shock absorbing materials and a thoroughly tested parachute.

THE HUB

A ground station designed for fully automated package on- and un- loading as well as exchange of battery. The Hub offers a storage capacity of up to 40 packages and do not require human-drone interactions.

SERVICES

We adjust to your needs

Our ground station, the Hub, is highly scalable and can be adjusted to individual capacity and interface needs.

Service agreement

We provide, maintain and operate all infrastructure: You only pay for logistics services.

Competitive pricing

We guarantee that we will match today's logistics costs.
